

State Authorization Disclosures

Licensure Programs

DCI Career Institute's Massage Therapy program does meet the educational requirements for the state of Pennsylvania to become licensed as a Massage Therapist.

At the present time, DCI does not have information for each state on whether or not DCI's program will meet their requirements. The pandemic has made acquiring this information difficult. If a student wants to investigate the portability of a license from Pennsylvania to another state, DCI staff will assist the student with that investigation.

Credit Transfer

Transfer of credit information is found in the school catalog.

Additional Disclosures

For information on the following:

- Percentage of the institution's enrolled students by gender, race, ethnicity; pell grant recipients, job placement and retention please go to <https://nces.ed.gov/collegenavigator/>
- Vaccination policies may be found in the school catalog

Fire Safety Plan

Each year the fire extinguishers are inspected and approved. As DCI is located in a mall, the mall management does periodic fire safety inspections of all premises. DCI does at least two evacuation drills per year to prepare should a fire occur.

Third-Party Educational Services

For students enrolled in the Medical Assistant, Medical Office Assistant or Computer Network Services programs, they will participate in an externship that is done at locations other than DCI Career Institute. The externship is explained in detail during the admissions process. A written agreement is completed for each externship site once a student has made their selection and the site has approved the student.
