

Written Arrangements Information

DCI Career Institute has externships for our Medical Assistant, Computer Network Specialist and our Business Information Program where the student completes this portion of the program outside of the institution. The student participates in a 120 hour externship site at a location where they are able to apply the skills sets and knowledge obtained in their respective fields of study. The student will be supervised by an individual at the approved site and the student will receive a performance evaluation for that experience. In this situation their transportation costs may increase due to traveling to their externship site. Typically, sites are no more than 15 to 20 miles from their place of residence. Additionally, there may be a cost incurred for some sites where the student is required to purchase uniforms or clothing requirements specific to that site.
